PROJECTS

Web Developer | **"Story Squad"** | GitHub-FE | GitHub-BE | Github-DS | Live
September 2020 - October 2020
An educational platform aimed at children ages 8-12
- Researched Ant Design Library in order for the team to understand the existing scaffolding architecture of our project
- Built, implemented 3-5 React components, including a reusable modal to display single/multi-step forms
- Tested front-end code using Jest/React Testing Library
- Collaborated with a remote cross-functional team of 6 developers, communicating through Zoom, Slack, and Trello

Web Developer | **"Conway's Game of Life"** | GitHub | Live
Cellular automaton, touring machine simulator
August 2020 - September 2020
- Worked independently to develop a visualization of Conway's Game of Life algorithm using React and SCSS
- Deployed to Netlify to ensure continuous deployment
- Researched algorithm documentation to ensure 100% implementation accuracy

Web Developer | **"Nasa Apod API"** | GitHub | Live
Displays a daily image and description from NASA
July 2020 - August 2020
- Developed with React/SCSS
- Designed automated tests using Jest and React Testing Library
- Deployed the application to Netlify to ensure continuous deployment
- Utilized the NASA APOD API via the Axios library to obtain images and descriptions
- Designed this to be a fully responsive application
- Implemented the Axios library for API calls to NASA's API

EXPERIENCE

Ticket Avengers, Farmington Hills, MI./Remote
Full Stack Web Developer | Ticket Avengers
May 2021 - Present
- Collaborates on a cross-functional team of developers to ensure deadlines are met, engineering specifications are followed, and that the company vision stays in focus
- Adheres to a Figma design file to ensure design specifications are met
- Utilizes Git/GitHub for versioning control and team collaboration

Absolute Home Services, Frankfort, IN.
Small Business Owner
March 2000 - October 2019
- Discovered my passion for Web Development while building my own website and learning HTML, CSS, and PHP
- Incorporated my love for coding into creating an automated job cost estimator/payroll program in Excel
- Mentored my crew on time management skills increasing productivity by approximately 80%
- Managed 10 - 15 employees individually, providing consistent feedback
- Delegated tasks across 3-5 teams to ensure client specifications and deadlines were met

SKILLS:
JavaScript | ES6 | React | LESS | SCSS | Responsive Web Design| Node.JS | Express | PostgreSQL | Python | Git | GitHub

EDUCATION
Lambda School, Remote
Full-Stack Web Development & Computer Science
Oct 2019 - Oct 2020

Lincoln Technical Institute, Indianapolis, IN.
Automotive Technologies Certification
2000 - 2001
